

New pricing effective May 1st, 2005

Enclosed is the new list pricing effective May 1st, 2005. As many of you have realized, steel prices have taken a dramatic increase over the past year. We have chosen to keep our pricing as low as possible and not pass on all the extra costs associated with the steel increase. Please place orders prior to May 13th to get the old pricing. For new Controls/Disconnects pricing request price sheet XL007. Contact factory for pricing on special product configurations.

Zone Controls

Sometimes labeled the Du-all for zone controls, the EB-ZTA-1 offers the greatest flexibility and simplicity when it comes to one zone control giving you the greatest options for field zone wiring. Wiring in thermostats, multiple pumps, zone valves, two temperature requirements, priority staging, *staging of TS Series boiler*, and monitor lights; and this all takes place within the same zone control. Also check out the other zone control options that fits best for your application.

Promote USA Made Products By Attending Our 2005 Summer Factory Tours & Training

Electro would like to invite our customers to stop by for a factory tour (everything is USA, Monticello, MN made) and also would invite those who would like specialized training (2-3 hours) on products to sign up for any Tuesday throughout the summer. There is no charge for this training. By attending, your name will be put in a drawing for monthly giveaways such as: Twins tickets, jackets, weekend getaway, etc. Contact Dean for sign-up and training options.

Examples of training topics:

- *Understanding WarmFlo*
- *Plenum Heater Mechanical Installation – Do's & Don'ts & What To Look For*
- *Wiring Applications*
- *WarmFlo & Electro-Mate Troubleshooting*
- *Selling Electric Heat, Fuel Cost Applications, Radiant & Storage Heat Principles*
- *Boiler Troubleshooting*
- *Boiler Mechanical Installation – Do's & Don'ts & What To Look For*
- *Boiler Zone Controls & Wiring – Making It Simple*

Mini-Boiler Displays

Electro Mini-Boiler displays are a great way to draw attention at a home show or add additional color and interest to your lobby or show floor. Built on a polished aluminum stand with brass piping, see-through boiler cover, tile flooring with visible tubing, and programmable scrolling color display; this mobile unit is a valuable tool when promoting in-floor hydronic heating. Available now for pick-up.

GenConnect™

Severe weather on the Eastern and Southeastern coast of the US has created exceptional sales growth of the Electro *GenConnect* generator transfer switch. Homes that would otherwise have been without power for weeks after a tropical storm kept their lights on and their refrigerators cold with a generator powering their whole house through a *GenConnect* transfer switch connected at the utility meter. And with state-of-the-art safety features built in, no generator power is ever back fed onto the utility lines.

The *GenConnect* has evolved into one of the safest, most economical and reliable methods of connecting a standby or portable generator to a home or shop. Installations with a portable generator can be completed in less than 30 minutes.

Contact Electro for application information on our complete line of automatic and semi-automatic models.

New Construction Help

Electro has the software and tools necessary to help in designing a radiant and forced air heating system for your new home, business, church, etc. Please contact Jon Smith with your new construction requests.
